

JRMSTM

WATER & WASTEWATER TREATMENT PLANT MANUFACTURER

www.jrmsindia.com

JRMSTM
Engineering

Works established a decade ago is serving customers for all kinds of requirement in Water & Waste water Treatment solutions with customized and innovative solutions. An ISO 9001: 2008 certified organization having its own manufacturing facility and registered office in Kolkata. Our Strength is to Understand Our Customers Problem in depth and by that Understanding Provide Complete Solutions with World Class Products and Best possible Application Support. We understand that each facility's process and treatment requirements are different. Our vast industry knowledge and experience allows us to tailor the best treatment solution based on each customer's unique needs. Our Network has setups at various locations throughout India and Indian subcontinent for all range of products.

We have been a leading supplier of water Treatment Plant, sewage Treatment Plant, Effluent Treatment Plant, Septic Tank, Water storage Tank, DM Plant, Bio Digester, Bio Toilet, solutions in India using state-of-art technologies and the most advanced solutions as well as most reliable solutions in the industry.

Our robust processes are capable of delivering Reusable quality of water in a cost effective way.

Our end-to-end solutions are made using 100% fibre reinforced plastic (FRP) tanks, offering corrosion free, long lasting (15-20 years) customized treatment units. Modular and compact, our plants are designed to be upgradable to latest technologies, reduce maintenance costs and occupy minimum space

 Date/Place: 07.03.2012

Mr. J.R.M.S. (New profile) Importer-Export Code No. **18MUPP99012D**

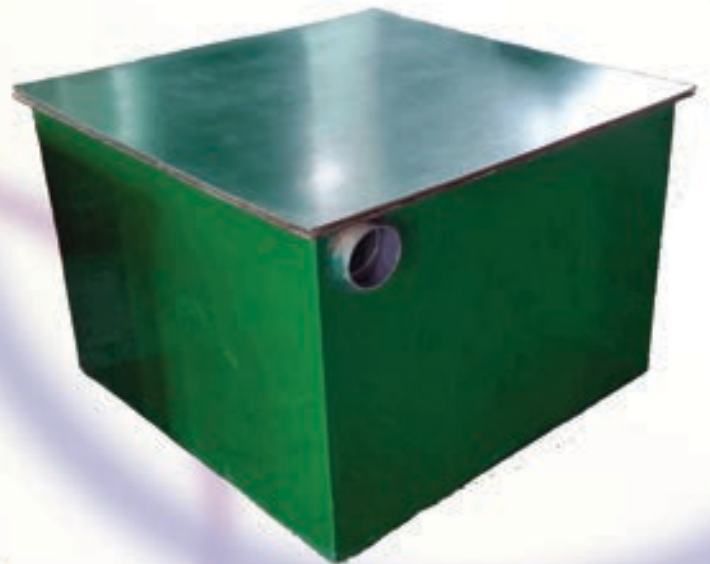

Biodigester

Anaerobic
Tank

Advantages:

- Eco Friendly
- Rust Proof
- light Weight
- Durable
- Leak Proof
- Easy To Install
- FRP Filament Wound Process
- Excellent Performance

Bio-Digester is a decomposition mechanized toilet system which decomposes Human Excretory Waste in the digester tank using specific high graded bacteria further converting it into methane and water, discharged further to the desired surface.

The Bio-digester is total maintenance-free system, which does not require any sewage system. The Bio-cultured bacteria used in these bio-digester procreate & generate new bacteria in an anaerobic environment.

Human waste disposal in innocuous form is an ever growing problem leading to aesthetic nuisance, threat of organic pollution & several infectious diseases in epidemic proportions due to contamination of ground water and drinking water resources in highly populated and developing countries, like India. Less than 30% of Indians have access to the toilets. In rural areas about 10% of houses have toilets and rest of the people go to open defecation. Population in the cities although have better access to the toilets but only to the tune of ~70%. Untreated waste is responsible for several diseases like, dysentery, diarrhoea, amoebiasis, viral hepatitis, cholera, typhoid etc. taking the life of lakhs of children annually.

Salient Features

- No bad smell in toilets from the tanks
- Faecal matter in the tank not visible
- No infestation of cockroaches & flies
- No clogging of digester
- Effluent is free from off odour and solid waste
